

SRIRAM R

Full Stack Developer

Kallakurichi | +91 9360524673 | sriramravisankar77@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFILE SUMMARY

Entry-level Full Stack Developer skilled in Python, Django, React, PHP and MySQL. Built and deployed database driven web applications on Render, including REST APIs, JWT-based authentication and RBAC, and billing systems with automated calculations, with hands-on experience in API integration, testing and debugging.

TECHNICAL SKILLS

Languages: Python, JavaScript, PHP

Frontend: React, HTML5, CSS3, Bootstrap, Tailwind CSS

Backend & Design: Django, REST API design, Authentication & Authorization, JWT, Middleware, RBAC, MVC component architecture

Database: MySQL, SQL (Queries, Joins, Schema Design)

Testing & Tools: Manual & API-level testing (Postman), Git, GitHub, VS Code

Practices: AI-assisted development (Copilot/ChatGPT for boilerplate, debugging, code review), Technical documentation (README, setup & API docs)

PROJECTS

Smart Hostel Mess Management System | Python, Django, JavaScript, Twilio API Aug 2025 – Oct 2025

- Developed and deployed a **Django** hostel mess management app on **Render** with **10 modules** covering student and admin operations.
- Implemented **RBAC** for **2 user** roles using **Django middleware** and protected routes.
- Automated monthly billing by calculating approved leave days and applying per day deductions to generate final amounts.
- Built a **JSON API** endpoint for real-time dashboard updates and integrated **Twilio's WhatsApp API** to send notifications.
- Configured production deployment on **Render** with **Gunicorn**, environment variables, database migrations, and WhiteNoise for static files.
- Debugged and resolved backend issues across billing logic, authentication and API errors through manual and **API-level testing**.

Vehicle Service Management System | React, PHP, MySQL, JWT Jan 2026 – Mar 2026

- Developed a full-stack vehicle service management system with **10 core modules** covering services, inventory, billing, customers, reports and staff operations.
- Built 25 custom PHP REST API endpoints** connecting **React** components with **MySQL** using **GET, POST, PUT and DELETE** operations.
- Implemented **JWT-based authentication** and **RBAC** with **3 user roles** and **20+ granular permissions**.
- Developed billing and invoicing functionality with parts, labour, discounts, GST, payment tracking, and automatic balance calculations.
- Implemented inventory management** with supplier tracking, purchase logging, real-time stock calculations and stock deduction for service usage.
- Built **role-specific dashboards** and reusable React components with service analytics, revenue tracking, inventory metrics and mechanic job management.

EDUCATION

Master of Computer Applications (MCA) | 76% 2024 – 2026
Bharathiar University, Coimbatore

Bachelor of Computer Applications (BCA) | 77% 2021 – 2024
Jamal Mohamed College, Tiruchirappalli

CERTIFICATIONS

- Python Programming & Software Design for Absolute Beginners — Udemy (Apr 2024)
- Google Cloud Storage for Large-Scale Data Storage — Infosys Springboard (Jul 2026)
